Pin-prick, *sb.* [f. PIN *sb.*¹ 3 + PRICK *sb.*]

2. *fig.* A petty annoyance, a minute irritation.

Policy of pin-pricks, a course of petty hostile acts maintained as a national or party policy: applied first in Nov. 1898 to the policy attributed to France in reference to the conflicting colonial interests of France and Great Britain.

The French use of a corresponding phrase *coup d'épingle*, 'pin-stroke', goes back some centuries; in Eng. 'pin-pricks' is found in political use in 1885. On 8 Nov. 1898 the French journal *Le Matin* deprecated a 'politique des niches à l'Angleterre', and 'de continuelles piqûres d'épingle'; on 16 Nov. *The Times*, referring to this article, used the words 'a policy of "pinpricks"'; *Le Temps* of 19 Nov. (publ. evening of 18th) had an article denying on the part of France the existence of a 'politique de *coups d'épingle*', *The Times* of 19 Nov. quoted this as a 'policy of pin-pricks' (see quot.), which forthwith became a political phrase.

1885 *Public Opinion* 9 Jan. 29/2 Petty pin-pricks on the coast of Africa had rather irritated than roused public opinion. 1887 ROSA N. In the literal sense, this is now expressed by Peep *v.*[1], and in a special sense by Pip *v.*[2]

L. *pīpāre*, beside *pīpāre*, *pīpīre* (all app. in same sense), was evidently echoic, imitating the voice of chickens and little birds; similar forms could arise independently in any lang. Thus, beside the forms above, MDu., MLG., Du., Low., mod.Ger. have a weak vb. *piepen*, (pijpen, *Reuter*, *fistulare*, *tibia canere*, piepen als vogels., *piper comme les petits poulsins*, *pipire*, Plantijn 1573), It. has *pipire* 'to peepe as a chickin' (Florio), Fr has *pipier*, *pépier* in same sense, Eng Peep *v.*[1], Pip *v.*[2] App the tendency in all the langs. to associate the orig. vb. with the sound of the musical instrument (cf F. *piper* in Godef. *Compl.*) led to the use of forms more directly imitating the weak cheep of the chicken, etc., for the expression of the original L. sense.]

6. An excavation made for obtaining coal; the shaft of a coal-mine; also, often applied to the mine as a whole.

(Orig. the same as in *chalk pit, sand pit*, etc., in sense 1 b, and doubtless going back to the time when the coal-pit was, like these, merely an open excavation; hence also its technical restriction to the shaft, which is the open hole.)

1447– [see Coal-pit 2]. 1669 *Phil. Trans.* IV. 967 There being in these Mines an incredible mass of wood to support the Pitts and the Horizontal passages. 1708 J. C. *Compl. 7. *Pit and gallows*, more properly *gallows and pit*, in *Sc. Law* a phrase understood to denote the privilege, formerly conferred on barons, of executing thieves or other felons by hanging the men on a gallows and drowning the women in a pit: see sense 2. *Obs.* exc. *Hist.*

For this, ancient Sc. statutes in L. have *furca et fossa*. 'In some old deeds written in our language, these terms are rendered *furc* and *foss*' (Jamieson s.v.). The actual meaning of *pit* and *fossa* has been questioned. Du Cange has a quot. from Gervase of Canterbury in which *fossa* is an ordeal pit; so also in *Customals of Battle Abbey* (Camd. Soc. 126); and it has been suggested that this was also the original meaning in *furca et fossa*. But in support of the usual interpretation, see *Laws of Æthelstan* IV. 6 De fure, qui personam vel locum pacis adierit: § 4 Si libera mulier sit, præcipitetur de clivo vel submergatur (Schmid *Gesetze Angels.* 151). And cf. Old German Proverbs cited by Grimm *Deutsche Rechts-Alterthümer*, cap *Verbrechen u. Strafe am Leben*: (1) Der Mann an den Galgen, die Frau unter den Stein; (2) Den Mannern Hinrichtung mit dem Strang, den Frauen mit Wassern; (3) Den Dieb soll man henken und die Hur ertrinken. In Middle Dutch, where the parallel phrase *putte ende galghen* is very frequent, *putte* was a pit or grave in which women criminals were buried alive (*levend begraven*): see Verwijs and Verdam s.v. *Putte*.

The change of sense from 'marrow' or 'pith' to 'fruit-stone' is great, but the intermediate stage is supplied by the sense 'kernel, pip': cf. EFris. '*pitten åt de appels*', pips out of the apples (Doornkaat-Koolman).

[*Note.* The form of this verb, and the fact that it has the collateral form Pick *v.*1 (chiefly, but not entirely, northern), naturally suggests some etymological connexion with Pick *v.*1 (OE. *ꝑician* or *ꝑycian*). To this, in sense also, it stood originally in somewhat of a causal relation: *pick* to pierce or penetrate (with something pointed), *pitch* to cause to penetrate, to stick (something pointed) in. But no satisfactory explanation of '*ꝑiccian* as a causal derivative of *ꝑician* or *ꝑician* appears. And although the form *pitch* appears in both verbs, they are formally distinct, in that Pick *v.*1 occurs with short and long *i*, but only with *k*, never *tch*, while Pitch occurs both with *-tch* and *-k*, but never with long *i*. They are also quite distinct dialectally; dialects which use Pick *v.*2 for *pitch*, use *pike* for Pick *v.*1]

The Fr. *pitié* was the popular phonetic repr. of *pietātem*; *pieté* a clerical adaptation of *pietis*, and *pité* app. a semi-popular intermediate form.

The sense of L. *pietās* 'piety', was in late L. extended so as to include 'compassion, pity', and it was in this sense that the word first appears in OF. in its two forms *pitié* and *pieté*. Gradually these forms were differentiated, so that *pieté*, which more closely represented the L. form, was used in the orig. L. sense, while *pitié* retained the extended sense. In ME. both *pite* and *piete* are found first in the sense 'compassion', subsequently both are found also in the sense 'piety'; the differentiation of forms and senses was here scarcely completed by 1600.]

b. In modern use, forming the second element in the name of a group of houses in a town or city, now or formerly possessing some of the characters (positive or negative) of a square, chiefly that of not being properly a street.

Often used in the name of a small area more or less built around, and lying aside from a street or thoroughfare, or of a short *cul-de-sac* or byway turning out of a main thoroughfare; also, more vaguely given to a short row or 'terrace' of houses, which originally stood by themselves on a suburban road; being in fact a ready denomination for any aggregation of houses which cannot be more particularly classed.

Employed in 16th c. to render F *place* and its Italian, Spanish, and German cognates, in reference to foreign towns, whence introduced in English towns. (But in some cases the name 'Place' has arisen out of sense 4 b, the site being that of a nobleman's or bishop's town-residence, which bore the name, e.g. *Ely Place* in London.)

A plane superficies; in *Geom.*, a surface such that every straight line joining any two points in it lies wholly in it, or such that the intersection of two such surfaces is always a straight line; the simplest kind of geometrical surface, corresponding among surfaces to the straight line among lines. Hence, in *general* use, An imaginary superficies of this kind in which points or lines in material bodies lie; esp. a horizontal plane of such a kind, a level, as in 'clouds at various planes of elevation'.

Often (esp. in scientific use) with *of*, denoting the plane in which a particular figure, etc. is situated, or in or on which some process takes place; e. g. the plane of a circle, ellipse, etc., of the ecliptic, the equator, the horizon, a planet's orbit; a plane of denudation, of freezing, etc.; *plane of projection*, a plane upon which points, lines, or figures are projected. d. *Perspective.*

Directing plane: see Directing *ppl. a.* *Geometrical plane*, a plane parallel to the horizon below the line of sight, on which the object is supposed to be situated. *Horizontal plane*, a plane parallel to the horizon and passing through the eye of the spectator. *Objective, original*, or *primitive plane*, any plane situated in the object itself. *Perspective plane*, a transparent plane, usually perpendicular to the horizon, supposed to be interposed between the object and the eye, and intersected by straight lines passing from one to the other, which determine the points of the drawing: also called *plane of delineation* or *plane of the picture* (which terms may also be applied to the actual surface on which the drawing is made). *Vertical plane*, a plane perpendicular to the horizon, passing through the eye of the spectator, and intersecting the perspective plane at right angles.

1704 J. Harris *Lex. Techn.* I, Plane Geometrical, .. Horizontal. .. Vertical. 1815 J. Smith *Panorama Sc. & Art* II. 708 The situation of the eye .. must be laid down upon the paper, on which the perspective drawing of an object is to be made, unless we propose to look at the object itself as through a transparent plane. 1823 P. Nicholson *Pract. Build.* 540 A primitive plane is that which contains a point, a line, or a plane surface, of a given object. 1871 Dickson *Perspective* 24 Properly speaking the transparent plane should be understood to mean that vertical plane which is always assumed to be interposed between the spectator and the object to be represented. On the other hand, by the plane of the picture, which is frequently termed the plane of delineation, is meant the surface on which the perspective drawing is made. 1878 Abney *Photogr.* (1881) 244 One of the essential suppositions of perspective is, that the picture plane should be vertical and the line of sight horizontal.

Plantain [3] (plæ·ntɪn, -tēn). Forms: 6 platan, 6-8 plantane, 7-8 -an, -aine, -ine, 7- plantain, (7-8 plaintain). [In 16th c. *platan*, *plantane*, ad. Sp. *plátano* *plántano*, in same sense, identical in form with *plátano*, *plántano* plane-tree: see Plantain [2], Platan, Plane *sb.*[1]

There is no similarity of aspect or nature between the plane-tree and the plantain (a fact noted already by D'Acosta in 1590), so that no reason appears for a transfer of the name from the former to the latter. It has therefore been suggested that in this sense *plátano* was a corruption of some native name. And, in fact, the plantain or banana appears in Ant. Biet's Galibi Dictionary of 1664, and again in that of 1763, as *palatana*, in Raymond Breton's Carib Dict. of 1665 as '*Balátana*, grosses bananes', and in the Arawak lang. as *pritave*. But there appears to be no material for determining whether these are native words, or merely corruptions of the Spanish. The Tupi name of the fruit is *pacova*.]

1. A tree-like tropical herbaceous plant (*Musa paradisiaca*) closely allied to the Banana (*M. sapientum*), having immense undivided oblong leaves, and bearing its fruit, for which it is extensively cultivated in long densely-clustered spikes.

Musa paradisiaca and *M. sapientum* (the Banana), if really distinct species, are very closely allied, and some of their numerous varieties are scarcely distinguishable The names *plantain* and *banana* are also imperfectly differentiated. In the West Indies, Western Africa, etc, *banana* is applied to the forms with a purple-spotted stem, and a smaller and more delicate fruit, which is eaten raw; while the name *plantain* is given to those with larger and coarser fruit, which is cooked as a vegetable; but in India this usage is reversed, *plantain* being the general name: see Yule *Hobson-Jobson* In French, *banane* is the general name for both; so *bananier* a banana- or plantain-tree.

The reason why the Spaniards call it platano (for the Indians had no such name) was, as in other trees, for that they have found some resemblence of the one with the other, even as they called some fruites prunes, pines, and cucumbers, being far different from those which are called by those names in Castille. 1625 G. Plasmogen (plæ·zmǫdʒen). *Biol.* [f. PLASMO- + -GEN.] The chemical substance or highest or most elaborate form, stage, or part of protoplasm, which by its vital activity forms the tissues or other organic products: true or formative protoplasm; bioplasm.

1883 E. R. LANKESTER in *Encycl. Brit.* XXIV. 817/1 Physiologists have come to use the word 'protoplasm' for *one* of the chemical substances of which Schultze's protoplasm is a structural mixture—namely, that highest point in the chemical elaboration of the molecule which is attained within the protoplasm, and up to which some of the chemical bodies present are tending. This 'critical' substance, sometimes called 'true protoplasm', should assuredly be recognized by a distinct name 'plasmogen'.

Plasmogeny (plæzmǫ·dʒeni), **-gony** (-gŏni). *Biol.* [f. PLASMO- + -GENY. The variant *plasmogony* is ad. Ger. *plasmogonie* (Haeckel) with suffix repr. Gr. -γονία begetting, generation: cf. *cosmogony*.] Name for a mode of spontaneous generation: see quot., and cf. AUTOGENY.

1876 E. R. LANKESTER tr. *Haeckel's Hist. Creat.* I. 339 We call spontaneous generation *plasmogeny* when the organism arises in an *organic forma ine fluid*, that is, in a fluid which contains those requisite fundamental substances dissolved in the form of complicated and fluid combinations of carbon. 1904 M'CABE tr. *Haeckel's Wond. Life* xv. 369, I distinguished two principal stages—*antigony* (the formation of the first living matter from inorganic nitrogenous carbon-compounds) and *plasmogony* (the formation of the first individualised plasm; the earliest organic individuals in the form of monera).

Plasmology (plæzmǫ·lŏdʒi). [f. as prec. + -LOGY.] (See quots.)

1888 E. R. LANKESTER in *Encycl. Brit.* XXIV. 803/2 *Plasmology*—The study of the ultimate corpuscles of living matter. 1889 *Athenæum* 12 Jan. 47/2 Prof. Lankester assigns..to 'Plasmology' the study of the cell in its widest sense. 1895 *Syd. Soc. Lex.*, *Plasmology*, histology.

‖ **Plasmo·ptysis** (plæzmǫ·ptisis). *Biol.* [mod. (De Vries, 1877) f. PLASMO- + Gr. λύσις loosing, setting free.] Contraction of the protoplasm of a vegetable cell with separation or freeing of the lining layer from the cell-wall, due to the withdrawal of liquid by exosmosis when the cell is placed in a liquid of greater density than the cell-sap. Hence **Pla·smolyse** (-ləiz) *v.* [cf. *analyse*], to subject to plasmolysis, cause plasmolysis in; **Plasmolytic** (-lǐ·tik) *a.*, pertaining to, showing, or causing plasmolysis.

1885 GODDARD *Physiol. Bot.* (1892) 330 Such substances [as cause contraction of the protoplasm] are termed plasmolytic agents. 1886 VINES *Lect. Physiol. Plants* iii. 39 Turgid cells..in 10 per cent. solution, shewing complete plasmolysis. *Ibid.* 44 When the cells of the Beet-root are placed in syrup they become plasmolytic. 1888 HUXLEY & MARTIN *Elem. Biol.* xi. 404 In order to see the primordial utricle better, plasmolyse the cell by running in 10 p.c. salt solution. 1892 DARWIN in *Rep. Brit. Assoc.* (1892) 672 As the plasmolysing agent continues to act, a reverse movement takes place. *Ibid.*, In different stages of plasmolysis.

Pla·smosome (-sōum). *Biol.* Also *erron.* **plasma-**. [f. PLASMO- + Gr. σῶμα body.] 'A separate particle of protoplasm, such as certain particles observed in cell-nuclei' (*Syd. Soc. Lex.*).

1889 *Q. Jrnl. Microsc. Sc.* XXX. II. 168 The out-wandering plasmasomes form the so-called 'paranuclei' (Nebenkerne), which take so important a share in the regeneration of cells. 1900 E. B. WILSON *Cell* (ed. 2) 34 The so-called true nucleoli or plasmosomes.

Plasome (plæ·sōum). *Biol.* [a. Ger. *plasom* (Wiesner), shortened from his original term *plasmatosom*, f. Gr. πλάσμα, πλασματ- plasm + σῶμα body.] (See quots.)

1895 *Syd. Soc. Lex.*, *Plasome*,..a term used by Brücke and Wiesner for hypothetical minute vital particles, made up of a group of protoplasmic molecules, and constituting the smallest units which can exhibit the primary vital (functions). They correspond [to a certain extent] to Weismann's 'biophors', and to the 'pangenes' of de Vries. 1900 E. A. MINCHIN in *Encycl. Brit.* XXXII. 41/1 In other cases the assumption of invisible protoplasmic units has been inspired by a desire . to explain the general vital and animative powers of protoplasm, as, for example, the 'micellæ' of Nägeli and the 'plasomes' of Wiesner.

Plass, e, obs. form of PLACE.

Plasson (plæ·sǫn). *Biol.* [a. Ger. *plasson* (Haeckel), a. Gr. πλάσσων, -ον, pres. pple. of πλάσσειν to mould, form.] Name for the homogeneous protoplasm of hypothetical primitive organisms, not yet differentiated into nucleus and general cell-substance, or for that of non-nucleated cells or cytodes.

1879 tr. *Haeckel's Evol. Man* I. vii. 182 The vital activities of each cell form a sum of mechanical processes, which depend radically on movements of the smallest 'life-particles', the molecules of the living substance. If we call this active substance the Plasson, and the molecules the Plastidules, we may say that the individual physiological character of each cell depends on the molecular movement of its plastidules. 1904 M'CABE tr. *Haeckel's Wond. Life* vii. 163 On the first view, which I hold, the plasm, or living matter, of the earliest organisms on the earth .. was a homogeneous plasson or archiplasm—that is to say, a plasma-compound that was not yet differentiated into outer cytoplasm and inner caryoplasm.

Hence **Plasso·nity** (*humorous*, after *paneity*, etc.), the quality of being 'plasson'.

1882 COUES *Biogen* (1884) 33 The original arch-amœba is as much of a mystery as ever; we know not whence he came from, how he got there, or in what the essence of his plassonity subsists.

Plaster, †plaister (plɑ·stəɹ), *sb.* Forms: α. 1, 4– **plaster**, 3–5 **plastre**, 4 **-tir**, 5 **-tere**, **-tyr**, **plaaster**, **platster**. β. 4 **plaistre**, 5 **playstir**, **-tyr**, **-tre**, 5–7 **playster**, 5–9 **plaister**. [The form *plaister* occurs in sense 1 in OE., ad. pop. L. *plastrum* (med.L. in Du Cange), shortened from *emplastrum* a plaster (medical and in grafting), a. Gr. ἔμπλαστρον (Galen), var. of ἔμπλαστον plaster, salve, f. ἐμπλαστός vbl. adj. 'daubed on or over'. Cf. OHG. *pflastar*, Ger. *pflaster*, also from pop. L. In ME. reinforced by OF. *plastre* (13th c. in Littré, but the deriv. vb. *plastrir* in 12th c.), mod F. *plâtre*, only in branch II below (for which also med.L. *plastrum* (1233) is cited by Du Cange). Thus the medical sense was from med.L., the builder's sense through French. The collateral form *plaister*, which has been current since 14th c., and has sometimes been more common (as a written form) than *plaster*, occurs also in 14th c. in OF. (*plaistre*), but it was not the normal OF. form even in Norman or Picard, and its history is obscure. Although still frequent in the 18th c., and found in Dr. Johnson's writings, it was not recognized by him in his Dictionary. In mod. dial. *plaister* (plē·stəɹ) is the form in Sc. and north. Eng.]

The chronology appears to show that *plat* in sense 1 originated as a variant of Plot *sb.* sense 2, assimilated to Plat *a.* and *sb.*4 through association of sense, a *plot* of ground being usually a *plat* or flat area. Hence also, through the notion in sense 2 of 'a plan on the flat', arose senses 3-5. But sense 1 being indifferently *plot* or *plat*, the same vacillation of form extended to these senses, so that they also varied with *plot*, giving rise to senses 3-6 of Plot *sb.* Thus, in sense 1, *plat* is a variant of *plot*, but, in senses 2-5, *plot* appears to be a variant of *plat*. Branch III might be considered a distinct word; it represents OF. *plat* (14th c. in Littré) 'a platter or great dish; also, a dish of meat' (Cotgr.) = It. *piatto*, 'a platter, a dish, a charger, a plate'; also 'a messe or dish of meat' (Florio), med.L. *plat(t)um*, in origin the masc. or neuter form of the same adj. Play (plē), *v.* Forms: α. 1 plegian, (pleog-), *Angl.* plegian; 2–5 pleie, 3 plaiȝen, pleie, 3–5 pleiȝe, pleyȝe, 3–6 pley(e, 4–7 plai(e, playe, 4– play, (6 ploe). β. 1 *Angl.* plegian, (pleag-)ian, 3 plaȝe, 4–6 plaw(e, 6 *Sc.* pla, 7–9 *dial* plaw. γ. 2 3 pleoȝe(n, 3 pleoȝe, pleowe, pleuwe. Pa. t. and pple. **played**: pa. t. 1 plegode, -ede, -ade, pleoȝede; plaȝede, pleaȝede; pleȝde, pleȝede. Pa. t. and pa. pple. often contracted; pa. t. 3–5 plei'de, 4–5 pleyde, *Sc.* plait, 4–8 plaid, 6 playd, pled, *Sc.* plade, 7 plaide; pa. pple. 4 pleide, 6–7 playd, 6–8 plaid. [OE. *plegan*, *-ean*, *-ian*, *plagian*, *plægian*, corresp. to MDu. *pleyen*, *pleien*, *playen* to dance, leap for joy, rejoice, be glad (Verwijs and Verdam). As to its relation to OS. *plegan*, Du. *plegen*, Ger. *pflegen* 'to have the care of, take charge of, attend to, cultivate', 'to be in the habit of, to be wont or accustomed to', see below. The OE. verb is recorded in several diverging forms, so that it is difficult to determine its original type and the conjugation to which it belonged. The usual WSax. form *plegian* gave ME. *pleie(n*, later *plaie(n*, *play*; the OE. *plagian* in Anglian texts gave the northern *plawe*, *plaw*. The γ forms in 2–3 *pleoȝe*, *ploȝe*, *pleowe*, *pleuwe* appear to mix the two.

The primary senses under each of the following branches were already in OE., and the order of their development is more or less inferential; but all the uses of 'play' are seen

to arise naturally from a primary notion 'to exercise, bestir, or busily occupy oneself', the line of development having been here determined by the recreative or divertive purpose of the exercise. In the miners' 'play', the sense of exercise or busy occupation disappears, and the word (sense 15; cf. PLAY *sb.* 13) comes to mean 'to cease work, to be idle'. The same primary notion, developed in quite a different line, accounts for the continental senses of *plegen, pflegen*, 'to have care of, take kindly charge of, cultivate', and 'to be in the practice or habit of', notions which evidently imply occupying oneself busily about a thing or person, and habitually exercising oneself in an action.]

'I'll pleease you for 't.'

II. 6. *intr.* To be pleased, to like; to have the will or desire; to have the humour; to think proper. (In sense, exactly = the passive in 4, 4 b.)

The history of this inverted use of *please* (observed first in Scottish writers) is obscure. But exactly the same change took place in the 14th c. in the use of the synonymous verb LIKE, where the impersonal 'it liked him', 'him liked', became 'he liked' *c* 1430. It may therefore be assumed that 'I please' was similarly substituted for 'it pleases me', 'me pleases' (*c* 1440 in 3 c). Cf. also Malory's 'me ought', in alliterative *Morte Arthure* 'me aughte', with Wyclif's 'Y awȝte', later 'I ought'. The remarkable thing in the case of *please* is that the sense was already log cally expressed by the passive *to be pleased* (sense 4), and that the new idiom was therefore not needed, 'he pleases' being simply = 'it pleases him', and 'he is pleased'. Shakspere uses the three forms indifferently. Indeed, all the constructions of the vb., exc. 6 c, are richly exemplified in his works: see Schmidt.

b. *If* (†*and, an*) *you please*: if it please you, if you like, if it is your will or pleasure: a courteous qualification to a request, the acceptance of an offer, etc.; also (parenthetically), a sarcastic way of emphasizing any surprising statement, as if asking leave to make it. (So F. *s'il vous plaît.* Cf. *by your leave*: see LEAVE *sb.* 1.)

Here *you* may have been originally dative, as in 3 b (i.e. if (it) please you, = L. *si vobis placet*, F. *s'il vous plaît*, Ger. *wenn es Ihnen gefällt*), as in quot. 1483 in 2; but it is now taken as nominative (i.e. if you are pleased, if you like, if it is your will or pleasure): cf. *if he pleases; if they please*, above (in 6); and 'if ye please' here in 1530. Shakspere has both *if you be pleased* 4 b), and *if you please*.

c. *Please!* (imperative or optative) was app. originally short for *please you* (3 c) = 'may it (or let it) please you'; but it is now usually taken as = 'Be pleased' (imperative of 6), or as short for 'if you please' (6 b).

This use of *please* appears to have been unknown to Shakspere, whose shortest form is *please you* (3 c).

When parenthetical, or without construction, *please* is = may it please you, if it please you, if you please; e.g. Please, may I go out? May I come in, please? Come here, please; Give me my hat, please; Please, Sir, did you call? Shall I ring the bell? Yes, please. Will you, please, take a message for me?

But when followed by an infinitive, it is = Be pleased: e.g. Please to excuse my keeping you waiting; Please to return the book soon; Please not to lose it.
